

OUR WORLD IN WORDS AND FILM LLC

This is a media organization dedicated to news, film, and storytelling about Parkinson's Disease and other movement disorders. Our mission is to raise awareness, share powerful narratives, and provide insight into the challenges faced by millions worldwide. With 90,000 new Parkinson's diagnoses each year in the U.S. alone, and the number steadily rising, our work is focused on informing, connecting, and supporting a rapidly growing global community affected by these conditions.
